Activity 06: Device Anatomy

Subject: E-Waste Management (INFT)

Student: Shreesh Khamkar | Roll No: 24101B0026 | Class: INFT-B

Hardware Teardown and Material Composition Analysis:

Disassembly breakdown of consumer electronic hardware [Smartphone / Motherboard]:

- Printed Circuit Board: Gold, Copper, Palladium, Silver contact pins.
- Chassis and Case: Recyclable Aluminum, Polycarbonate alloys, and ABS plastics.
- Battery Cell: Lithium Cobalt Oxide cathode, graphite anode, copper/aluminum foils.
- Display Panel: Indium Tin Oxide [ITO] thin films, liquid crystals, and glass substrate.
