Activity 07: Data Analysis

Subject: E-Waste Management (INFT)

Student: Shreesh Khamkar | Roll No: 24101B0026 | Class: INFT-B

Empirical Statistical Analysis on Institutional Electronics Waste:

Analyzed dataset of post-consumer device turnover in academic environments.

- Most frequently replaced items: Earphones, charging adapters, USB cables.
- Average replacement interval: 14 months for peripherals, 32 months for computing units.
- Recycling rate prior to institutional collection drives: < 12%.
