Activity 09: Green Hackathon

Subject: E-Waste Management (INFT)

Student: Shreesh Khamkar | Roll No: 24101B0026 | Class: INFT-B

Sustainable Tech and Hardware Upcycling Hackathon Blueprint:

Collaborative event challenging students to repurpose and write lightweight software for obsolete hardware.

- Track 1: Linux Lightweighting - converting old desktop PCs into low-power intranet servers.
- Track 2: Hardware Salvage - extracting working cooling fans, displays, and stepper motors.
- Track 3: Smart E-Waste Bin - IoT sensor monitoring fill-levels of campus recycling containers.
